

## Year 2

We've had a fab start to the year in Year 2. We have managed to do so much in 7 weeks. We have been learning all about harvest. We learnt the differences between fruit and vegetables and where the food we eat comes from. Did you know that some of our fruits and vegetables come from different countries! We also found out how farming has changed over the last 100 years and we took a trip to College Lake to look at how farming machinery is used and how it has changed.

learnt about using lines and dots to create texture and how to create different tones using colouring pencils. We did observational drawings of different fruit and vegetables using these skills.

We made a delicious vegetable soup by learning how to cut and peel vegetables.
