

It has been great being back in school with everyone! We have been having so much fun and have loved catching up with each other. We shared what we have been doing since we last saw each other and thought about what we would like to do and achieve now we are back in school.

In our first week back, we continued sewing our Christmas stockings, they are all ready for next Christmas now! The children done an amazing job at using the running stitch to hold the two pieces of felt together and all the stockings were decorated beautifully. We also done some baking in the first week back too! We learnt how to assemble and mix ingredients to create scones for Mother's Day.

In English we have been reading the book Space Tortoise and we have revised some of the learning skills that we worked on during remote learning. We have also continued our class reading book, Danger Gang and cannot wait to see how it ends.

In Science we have been learning about plants. We discussed and identified different wild and garden plants and also identified different trees around the school. We have learnt what the difference between a bulb and seed is and will be carrying out an experiment after Easter to see how they grow. Also, did you know we eat lots of different bulbs and seeds?

In Geography during remote learning and since being back at school our topic has been The Local Area. We have learnt how to interpret and draw an aerial view map. We drew our maps of the school and included all the relevant landmarks and features such as the buildings, the pond, the carpark and of course the play grounds.

We cannot wait to return after Easter and get started on our learning in Summer Term. We are looking forward to learning more about plants, Kampong Ayer, Kings and Queens and so much more!
