

Summer term has been really fun in Year 2!

We have been learning lots of new things in Maths. We learnt how to find fractions of shapes, amount and lengths. We also learnt how to tell the time on analogue clocks.

We have been reading Duffy's Lucky escape in English and have been writing our own stories. From the story we have learnt about how important it is to look after animals and to not pollute their habitats.

In Science we have been learning about animals and their habitats. We know how animals are suited to their habitats and how some have adapted over the years. We have learnt about what food chains are and how some animals are carnivores, herbivores or omnivores.

In Topic we have been learning about British Kings and Queens. We have looked at who has been on the throne and when. We then used this to create a timeline of British Monarchs. We had a debate about whether Richard III was guilty of murder or not! We couldn't decide as a class on a verdict as we had many different brilliant reasons for each side of the argument.

Recently it has been Olympic week! As a class, we have been learning about the country Spain. We got to try lots of different Spanish food, such as Spanish omelette and olives. We learnt about all the different sports that included in the Olympics and we got to have a go at some Paralympic sports. We all thoroughly enjoyed sports day and all made and took home a gold medal!

It has been a fantastic summer term in Year 2 and the whole class cannot wait to see what they will be learning next in Year 3!
