

Summer Term in Year 5

We have had lots of fun in science this term, using our knowledge of designing fair tests to create scientific questions. We used sweets to investigate what variables would make them dissolve the quickest.

We were really surprised by some of our results and developed hypothesis for the 'why' behind what had happened and what we would investigate next.

In English, we read 'Varmints' by Helen Ward and wrote our own versions of the text, adding more detail. We worked really hard to develop some exciting, complex sentences.

Olympic week was great fun! Our topic this term is Ancient Greece, so we found out lots about the origins of the Olympic games and the different sports held then. We really enjoyed

our Paralympic workshop in school and tasting lots of yummy Greek food. We made flatbreads and have been thinking about what tasty ingredients we want to add to our own.
