

Reception Summer Term 2022

We have had been doing some super learning in Reception this term. We have been learning about lifecycles and we have taken a trip around the world to compare different continents.

We had real eggs in our classroom and 5 tiny ducklings hatched. We looked after them and had lots of cuddles with them. We also got to meet some small but fabulous animals including a snake, a Guinee pig with no fur and a cockroach! Some of us were a little bit scared but we all held the animals! Our resident hamster has been having fun with us and we have been looking after her by giving her water and food every day. We also had caterpillars growing in our classroom. They were very big and hairy, then they made their chrysalis and became butterflies.

We had a visit from a real dentist and got to brush our teeth. We then got to take our tooth brush home.

We have learnt about the weather, animals, school, children and food from continents around the world. Our teaching assistant told us all about where she grew up in Jamaica. We learnt about the Great Barrier Reef and cleaned our playground to stop plastic getting in the ocean so we can save lots of animals. We also made lots of landmarks from around the world including the empire state building and tower bridge. We have enjoyed trying food from around the world including plantain chips and tamarind. We even had an African drumming lesson!

In maths we have been doubling, halving, grouping and learning our number bonds.

In PE we have been having fun getting ready for sports day.

We are now getting ready to move to year 1. We are so ready and excited!
